

## **Professional Experience**

### **Safran Landing Systems – Walton, KY**

**Machinist** | October 9, 2023 – Present

- Applied mechanical expertise to support machining operations, specializing in Mazak machinery.
- Identified and solved technical issues, ensuring high-quality product output.
- Skilled in using micrometers, calipers, and welding techniques as part of team operations.
- **Responsibilities:**
  - Operate and maintain precision machinery to fabricate complex parts.
  - Perform quality control checks to verify that parts meet required specifications.
  - Collaborate with engineering teams to troubleshoot and resolve production issues.
  - Adhere to safety guidelines and maintain a clean and organized work environment.

### **Mazak Corp. – Florence, KY**

**Unit Assembly – Spindle Builder** | November 2022 – October 2023

- Assembled lathe spindles, adhering to company SOP and precise dimensional tolerances.
- Conducted runoff cycle evaluations to verify proper spindle operation.
- Utilized precision grinding and measuring equipment to maintain quality and functionality.
- **Responsibilities:**
  - Assemble mechanical components and ensure they are properly aligned and tested.
  - Follow detailed assembly instructions to complete tasks efficiently.
  - Perform troubleshooting and repairs on malfunctioning equipment.
  - Maintain inventory of parts and tools, ensuring availability for production needs.

### **Mazak Corp. – Florence, KY**

**Tool Room Operator** | October 2021 – November 2022

- Managed high-quality part operations with an emphasis on precision.
- Oversaw inventory and ordering, demonstrating proactive problem-solving and process improvement.
- **Responsibilities:**
  - Set up and operate machines to produce parts according to customer specifications.

- Inspect and measure finished products to ensure they meet quality standards.
- Coordinate with maintenance teams to ensure equipment is properly maintained.
- Assist in the training of new employees and ensure adherence to safety standards.

### **Wolf Steel – Crittenden, KY**

#### **Metal Fabrication | 2021**

- Shaped, bent, and formed metal according to blueprints, ensuring alignment with customer specifications.
- **Responsibilities:**
  - Operate machines such as presses, shears, and welders to fabricate metal parts.
  - Follow detailed blueprints to produce parts that meet client specifications.
  - Maintain and inspect tools and equipment to ensure they are in good working order.
  - Ensure compliance with safety and environmental regulations during all fabrication activities.

### **Norfolk Southern – Cincinnati, OH**

#### **Conductor | 2018 – 2021**

- Managed train consists, paperwork, and hazardous materials documentation, ensuring safety and adherence to SOPs.
- Demonstrated excellent organizational skills in tracking and documenting operations.
- **Responsibilities:**
  - Coordinate train movements, ensuring compliance with safety regulations.
  - Inspect train equipment and cargo for potential safety hazards.
  - Communicate effectively with engineers and other conductors to ensure smooth operations.
  - Prepare and manage necessary documentation, including safety checks and load manifests.

### **Kentucky Army National Guard – Walton, KY**

#### **Military Police Officer | 2013 – 2019**

- Led traffic control and emergency response operations, maintaining order and safety during critical situations.
- Coordinated with teams to ensure effective public safety management.
- **Responsibilities:**

- Maintain public safety and law enforcement during various operations and emergencies.
- Provide security at military bases and ensure the safety of personnel and equipment.
- Conduct investigations and gather evidence to support legal and military proceedings.
- Provide traffic control and crowd management during military exercises and public events.

### **Regal Power Transmission – Florence, KY**

#### **CNC Machinist | 2015 – October 2023**

- Operated CNC machinery, selecting tools, adjusting programs, and interpreting blueprints for precision.
- Contributed as a Setup Technician (2014-2015) and Production Operator (2012-2014), ensuring optimal production quality.
- **Responsibilities:**
  - Operate CNC machines to manufacture parts and components according to engineering specifications.
  - Monitor machine performance and make adjustments to optimize production.
  - Inspect finished products for quality assurance and troubleshoot any issues.
  - Ensure all equipment is properly maintained and cleaned, adhering to safety standards.

### **Various Roles – Manufacturing and Logistics**

#### **Material Handler, Production Operator | 2009 – 2012**

- Managed inventory control and product assessments, ensuring efficient preparation for shipping.
  - **Responsibilities:**
    - Load, unload, and move materials within a warehouse or production facility.
    - Track inventory levels and update stock records to ensure materials are available for production.
    - Operate forklifts and other warehouse equipment to move goods efficiently.
    - Ensure the accuracy of shipments and manage the preparation of goods for transport.
-

## **Educational Background**

**Liberty University – Online**

**Bachelor's in Information Systems: Information Assurance**

- Committed to continuous learning and skill enhancement in information systems and information assurance.
